Mutual action plan — SheetSpeed team pilot

Shared document. Short rows, not a narrative. Fill names and dates before day one. Security and legal run **in parallel** with the pilot, not after it. Prepared with the SheetSpeed trust pack.

Working title: [Company] × SheetSpeed pilot
Economic buyer: [name, role]
Champion: [name]
SheetSpeed contact: jarvis@agi-jarvis.com (Philip Dressler, Dressler Labs)
Pilot window: [start] to [end] — clock starts after install works, not on the day the idea is approved
Go/no-go meeting: [date] with [economic buyer]

Written success criteria (agree two or three before day one)

#	Measure	Baseline (before start)	Target by go/no-go	How we will know
1	[e.g. At least X of Y pilots use it in a typical work week]			
2	[e.g. Named workflow — close / forecast / deck — completed with shortcuts]			
3	[e.g. IT signs off that permissions and rollback are acceptable]			

Track A — Pilot use

Step	Owner (buyer)	Owner (SheetSpeed)	Date	Done?
Install works for the pilot group (allowlist or force-install on a small OU)				
Day-1 note sent to teammates	Champion	—		

Step	Owner (buyer)	Owner (SheetSpeed)	Date	Done?
Weekly 30-minute check-in	Champion	SheetSpeed	weekly	
One-page weekly summary (what was tested, result, next week)	Champion	—	weekly	
Midpoint: criteria on track? If already met, do not wait out the clock	Both	Both		

Track B — Security, legal, procurement (start now)

Step	Owner (buyer)	Owner (SheetSpeed)	Date	Done?
Trust pack sent (https://sheetspeed.agi-jarvis.com/trust/)	Champion	—		
IT / security review; questions answered	IT	SheetSpeed		
DPA / privacy / terms review if required	Legal	SheetSpeed		
W-9 or vendor setup if required	Procurement	SheetSpeed		
Confirm the buyer’s software-request path for a purchase of this size	Champion	—		

Track C — Decision

Step	Owner	Date	Done?
Commercial next step drafted (even if the answer may be “stay on free Core / wait for billing”)	Both	before go/no-go	

Step	Owner	Date	Done?
Formal go/no-go against the written criteria	Economic buyer		
If go: rollout plan and (when billing is open) commercial terms	Both		
If no-go or pause: rollback (Block / remove force-install) and note why	IT + champion		

Stall red flags

Treat these as a prompt to ask, not as an automatic cancellation:

- No economic buyer named, or “I will forward this to my team” with no evidence it was sent
- Security pack not opened; questionnaire requested but the public pack was not read first
- Weekly check-in skipped twice, or no one in the pilot group has installed it after setup was confirmed
- Legal or procurement left until the last week of the pilot
- Success criteria still unwritten after day one

If engagement drops, ask once whether this is still a priority. Pause rather than chase a dead pilot.
